Daniel Osei

Product Data Scientist

Pune, India · +91-90000-77777 · daniel.osei@example.com · github.com/daniel-osei-example

Summary

Product data scientist who turns messy event data into decisions. Four years of experiments, metrics and dashboards for consumer apps. Happiest close to the product team.

Experience

Brightline Health, Pune — *Senior Data Analyst*
JAN 2022 – PRESENT

- Designed and analysed 25 A/B tests on the booking flow, including one that raised completed bookings by 7% and is now the default flow for all users.
- Built the weekly product metrics model in dbt and Looker, used by four product teams.
- Taught a monthly SQL clinic for product managers.

Kitepost, Remote — *Data Analyst*
JUN 2019 – DEC 2021

- Tracked onboarding drop-off with funnel reports in SQL, which led to a shorter sign-up form.
- Cleaned and documented the event schema of the mobile app.

Things I've Built

Tidewatch – flood alerts from river gauge data (live, code) 2024

- Sends a text alert when a river gauge rises faster than its seasonal pattern.

Menu Mapper – nutrition labels from menu photos (live) 2023

- Reads menu photos with OCR and matches dishes to a nutrition table.

Education

University of Pune — *B.Sc. Statistics*
2016 – 2019

Skills & Tools

Python, SQL, dbt, Looker, A/B testing, causal inference, Git
