## PROFESSIONAL SUMMARY

Data analyst turned machine learning engineer with three years of shipping forecasting models for retail. Builds clean data pipelines and explains results to teams outside data. Looking for a role on a small applied ML team.

## WORK EXPERIENCE

**Larkspur Analytics** Mar 2023 – Present
*Machine Learning Engineer* *Bengaluru, India*

- Built a demand forecasting model in Python and LightGBM that cut stock-outs by 18% across 40 stores, and set up weekly retraining with drift checks on every feature.
- Moved nightly feature jobs from cron scripts to Airflow, with alerts on late or failed runs.
- Wrote the team's model review checklist, now used for every release.

**Northgate Retail** Jul 2021 – Feb 2023
*Data Analyst* *Chennai, India*

- Automated the weekly sales report in SQL and Power BI, saving about six hours a week.
- Cleaned five years of point-of-sale data and documented every field for the analytics team.

## PROJECTS

**Shelf Monitor** | Python, OpenCV (live, code) 2024

- Counted products on shelf photos with a fine-tuned YOLO model at 92% precision.

**Route Planner** | Python, OR-Tools (live) 2023

- Planned delivery routes for 30 vans, about 11% shorter than the manual plan.

## EDUCATION

**Anna University** 2017 – 2021
*B.E., Computer Science | CGPA 8.4/10* *Chennai, India*

## SKILLS

**Languages:** Python, SQL, R
**Tools:** Airflow, Power BI, LightGBM, Git, Docker
